## To Raise \$100,000,000 To Rehabilitate the Holy Land

The Jewish dream of centuries will now be realized as Palestine "Takes her place in the Sun" and becomes a free and independent state and a power among the nations of the world.

The Federation of American Zionist Societies is endeavoring to raise \$100,000,000 to rehabilitate Jerusalem and Palestine, and it will do it. It has the will, the genius and the laudable ambition to accomplish its grand purpose.

Despite the fact that so many nations desolated by war are being aided by America and that gratuities are being showered upon many deserving charities, there is still a liberal hand for the Holy Land. In order that the burden may not fall too heavily on the few it is suggested that an opportunity be given whereby everybody may do his bit, and like it.

An enthusiastic Association of Zion's friends, including many very prominent Jewish people of this country have hit upon a pleasing and effective way of increasing the great Zion fund by many millions. This coterie has contracted with Mr. George L. Hutchin, author and producer, to exploit his stupendous and thrilling story of Zion entitled, "Judareal."

It is the purpose of the Association to exhibit the "Judareal" photograph under the auspices of the local branches of the Federation of American Zionists and to donate fifty (50) per cent of the net proceeds from such exhibitions to the Federation of American Zionist Societies for the rehabilitation of Jerusalem and Palestine.

When "Judareal" receives its final touches of artistry it will be a masterpiece. The finest technical directors and the most talented artists in filmdom are being employed to make this gigantic photoplay the wonder of modern times.

Those having the matter in hand have deemed it expedient to send a large company of screen stars to the Holy Land to photograph many of the more important and thrilling scenes of the cinema. Scores of the most noted Jewish actors and actresses are volunteering their professional services for this tour of tours. They wish to help the cause and they are anxious that the proper interpretation of Zion ideals be given the production.

"Judareal," while on a scale of magnitude never before attempted, will be the last word in the screen art. It symbolizes the noble Jewish character in one who triumphs through belief in the One True God. Overtures have been made to the British government for permission of this film expedition to go to Jerusalem and take the scenes necessary for the completed production, and ample assurances are not wanting that the request will be granted, and that General Allenby and his heroic army will lend every assistance in their power to successfully complete the undertaking. The expedition at this time deems it expedient to go via the Pacific touching at Honolulu, Yokohama, Tokio, Manila, Hong Kong and other great ports enroute. It is the plan

tootify the Zionists of those ports of call in advance, photograph the multitudes at the landing and release the film with the "News Service" of the world. The resultant power of good for Zionism will be incalculable.

There is so much wonderful music that will be applicable to the "Judareal" picture that it will have a wide field for the master musician to draw inspiration from when he composes his special score.

In a word "Judareal" is the return of Zion's ancient glory. It has wonderful heart interest carried by a thrilling and matchless story of undying love. It is a theme that appeals to Jew and Gentile alike. It is confidently hoped and believed that their portion of the receipts will net the Federation of American Zionists many millions of money.

**New Auto Horn.**  
A horn to be carried on the rear of an automobile, which sounds automatically when the car is backed, has been invented by a woman.

**Ancient Mirrors.**  
The mirrors of antiquity were principally of bronze, highly polished and about the size of an ordinary hand mirror. They were usually provided with a handle and sometimes were mounted on a stand. The principal feature of these ancient mirrors was the design incised on the back. They belong to the period about 400 to 500 B. C. During the middle ages, from the twelfth to the end of the fifteenth century, pocket mirrors or small hand mirrors carried at the girdle were considered a necessary part of a lady's toilet.
